THE Use of this Table is this: If thou wouldst know what the Interest of 100 and 5 pound is, for 9 Months, at Six per Cent. then in the first Column find out 100 at the Foot of the Column, and right again it is, under the title 9 Months, (which is the fifth Column) here you shall find 4 l. 10 s. And against the number 5 l. you shall find 4 s. 6 d. So that the Interest of 105 l. for 9 Months, cometh to 4 l. 14 s. 6 d. The same of all the rest.

Now advise with the honest and
 able Astrological Physitian; It is
 good to purge and let Blood, for in
 this Month the Humors and Blood
 increase, and gross Feeding breed-
 eth gross Blood and Humors;
 therefore use Meats of good di-
 gestion, and such as afford good
 Juice and Nutriment to the Body;
 forbear all things salt, purge the
 Blood by Portions, and Blood-let-
 ting: Sweet Meats and Drink are
 commendable. Be sure to eat in
 the morning before you drink.

The use of Physick becomes now
 seasonable; as also Purging and
 Blood-letting. It is good to abstain
 from Wine; for many Diseases will
 be taken thereby, to the ruine of
 many.

This Month the Pores of the
 Body are open, and apt to receive
 Physick; therefore this is the best
 time to remove, and prevent causes
 of sickness, or for speedy remedy
 in extremities. Pray to God for a
 blessing.

New Moon the 7 day, 38 min. past 8 in morn.
 First quarter the 15 day, 49 min. past 8 in morn.
 Full Moon the 23 day, 16 min. past 1 in morn.
 Last quarter the 28 day, at 10 at night.

D O R O S Now with thankfulness reap your
 desired Harvest. Sow Winter
 Herbs in the New of the Moon.
 Esteem fair weather as precious,
 and mispend it not. Gather Garden
 Seeds near the Full. Use moderate
 Diet, forbear to sleep presently af-
 ter meat. Take heed of sudden cold
 after heat.

Beware of Physick and Blood-
 letting in the Dog-days, if the Air
 be hot; otherwise, if occasion re-
 quire, you may safely make use
 thereof. Now moderate Diet is best.
 beware of Surfeits, Heats, and
 Colds, for Plurisies are ingendred
 thereby. Use not to sleep much, e-
 specially in the afternoon, for that
 brings opillations, headach, Agues,
 and Cathars; and all noxious dis-
 tempers of the same kind. Red
 Wine and Claret are excellent Re-
 medies for Children against the
 Worms.

Observations on October.

New Moon the 5 day, 9 min. past 5 afternoon.

First quarter the 13 day, 23 min. past 2 in morn.

Full Moon the 19 day, 9 min. past 8 at night.

Last quarter the 27 day, 7 min. past 8 in morn.

D. C. R. C. S. Sow Wheat and Rye, remove young Plants and Trees about the New Moon, observing this as a seasonable Secret, that in setting, you carefully place that side to the South and West which were so before you took up the Plant; otherwise the cold kills it. Gather your remaining Winter Fruit, set all kinds of Nuts and Acorns, and cut Rose-trees but once in two years, if you intend to have store of Roses.

The Garments you last Month hung on your backs in jest, now Button them close in good earnest: Cloath you now for prevention, for the Cold comes insensibly, and Fogs oftentimes beget a whole Winters cold. Consult with your Tailors, as well as Physicians.

A Description of the four Quarters of the Year

THe *Spring Quarter* begins this Year upon *Sunday* *March 10.* at 17 min. past 3 in the morning; at which time the *Sun* enters the Equinoctial Sign *Aries*, causing an equality of day and night all the habitable World over. *Summer* takes beginning *Tuesday June 11th*, 10 min. past 6 in the morning; the *Sun* then approaches our Zenith, and enters the first scruple of the Tropical Sign *Cancer*, making longest days with us, and shortest nights. *Autumn* or *Harvest Quarter* begins when the *Sun* touches the first scruple of the Equinoctial Sign *Libra*, which this Year will be upon *Thursday, Sept. 12.* 51 min. past 9 at night, again equalizing both day and night. *Winter* begins *Wednesday Decem 11.* 29 min. past 9 in the morning; the *Sun* then touches the first point of the Tropical Sign *Capricorn*, making the shortest day and longest night in the Year on this side the Equator, as also the longest day and shortest night to them who inhabit the Southern part of the World.

Of Eclipses happening this present Year 1678.

Five times this Year will the *Luminaries* be Eclipsed, three times the *Sun*, and twice the *Moon*. The first of the *Suns* falls upon *April 11.* at 3 in the morning; invisible to us, but may be seen in *Tartaria*, &c. The second Eclipse is of the *Moon*, *April 16.* at 5 afternoon; but invisible to us, and may be seen in *Persia*, *Arabia Felix*, and the *Caspian Sea*. The third Eclipse is of the *Sun*, *Octob. 5.* about 5 afternoon; invisible to us. The fourth of the *Moon*, *Octob. 19.* at 8 at night, and visible to most parts of *Europe*. Lastly, the fifth Eclipse is of the *Sun*, *Novemb. 4.* about 9 in the morning, and visible in the Northern Seas.
